 Made in Japan

Eyebrow growth tonic

# GRANMORE eyebrow treatment

With FUJI MULBERRY ROOT EXTRACT

Finished product

**Main active ingredient for Eyebrow Beauty Growth Tonic**

FUJI MULBERRY ROOT EXTRACT, a reputed ingredient used in scalp tonics for hair growth, has now been applied for Eyebrow Beauty Growth Tonic for eyebrow.

Regardless of their age, women are more and more interested in beautifying their eyebrows. They try to lengthen their eyebrows by using eyebrow pencil and adjust their eyebrow. However, as women apply eyebrow makeup more frequently, damage to their eyebrows increases.

As a result, they are increasingly experiencing problems such as eyebrows breaking or being lost.

We released FMRE (FUJI MULBERRY ROOT EXTRACT), a hair growth product, a few years ago both inside and outside Japan.

It has been confirmed in a number of tests that FMRE can realize a desirable hair cycle by shortening the telogen (rest) stage and lengthening the anagen (growth) stage.

Just like hair, eyebrows have their own hair cycle. The application of FMRE at the base of eyebrows therefore should result in the extension of the anagen stage, thereby lengthening and volumizing eyebrows.

**The Finished product with FUJI MULBERRY ROOT EXTRACT**

Product name : GRANMORE eyebrow treatment

Combination ratio of FUJI MULBERRY ROOT EXTRACT : 20%

The safety of the product has been confirmed by human patch testing.

**How to Use**

After cleansing your face, apply to the bases of your eyebrows twice a day, in the morning and at night.

Use within two months of opening. Let this product dry before applying eyebrow makeup.

A gentle flocky type for easy application
